

Tallow Cave

Last Updated Friday, 29 December 2006

(closed cave)

Location: Danby, VT

Description: Tallow Cave is notable for its copious amounts of 'moon milk', found throughout the cave. Located on the Purgatory Karst, this cave has been closed since 1992.

Pictures:

Looking back up the rappel into the Water Room. Note the coating of moon milk on the rope.

Several VCA cavers in the Water Room.

Bill Hammond examines some of the moon milk found in the cave.
